Less dust in the area is highly desirable from a health and safety perspective. Air quality is significantly improved, resulting in more pleasant riding conditions and decreasing the likelihood of riders and the horse developing any respiratory problems. The improved visibility also helps to protect riders, instructors, and horses from potential accidents.

Having a strategic horse arena dust abatement program in place can help protect the health and well-being of horses, riders, employees, spectators, and equipment. The Gasaway Company, utilizes over 35 years of experience to create customized horse arena dust control solutions throughout Illinois and the Midwest.
